***What you do
has relevance
GO PLACES***

We all pay for research

Greater understanding
More support for research
Increased participation
Less confirmation bias
New directions
FUN!

Connections matter

BUILD NEW CONNECTIONS

- **Academic priority K-12, urban/rural communities, tribal majority schools**
 - Not always well-funded, or valued, often ignored, subjected to standardized testing that primarily benefits others. Complex brain development underway, unacknowledged diversity, mental health...
- **Homeless youth (p:ear), incarcerated youth (MaClaren Correctional Facility)**
 - “It’s like people see me as an object, not as a human being”
- **Young graduate researchers, undergraduates (PSU, OHSU,...)**
 - How does my research relate to the world? How can I explain it?
 - Where can I go from here? “Alternative careers” in science...
- **Artists: Painters, Dancers, Storytellers, Musicians**
 - How does my work relate to other fields? How do I connect with new audiences?
 - How is my practice influenced and enriched by discoveries about the brain?
- **Area businesses (BioGift, Intel, Velo Cult, Hospitals)**
 - How can we better connect with everyone in our community?
- **Members of the public**
 - Why are my taxes spent on research? Art? What are we discovering? Making?

Why art & brains..?

- Motivation, engagement, **empathy**
- Exploration, creativity, INNOVATION
- **Personal relevance of STEAM material**

Neuroscience & the Law

MacLaren Youth Correctional Facility

Arch Rock Brewing, Gold Beach, OR

Alcohol and the brain

Art + Neuroscience = 3D printed brains

Collaboration with Make + Think + Code @ PNCA, Intel, PDX 3D Printing Lab!

NOGGIN FEST

A CELEBRATION OF SCIENCE, ART, AND MUSIC

FRI OCT 19

6pm-11pm

SAT OCT 20

12pm-12am

B***S OF THE SUN
SHANNON ENTROPY
DISENCHANTER
MOUTHBREATH
STARGASM**

Connect. *And copy!*

REACH OUT. PARTNER. GO PLACES.

There are resources in ALL our communities...

- Public schools, hospitals, art museums, homeless shelters, youth correctional facilities, pubs, retirement homes,...
- *And don't wait for institutions, especially if they focus more on preserving administrative structures instead of fulfilling their mission...*

Making a pipe cleaner neuron...

1. Start with a good amount of (colorful) pipe cleaners, I have 20 here.

2. Create the soma or cell body by linking several pipe cleaner hoops together.

3. Attach dendrites to your soma by wrapping them around the soma pipe cleaners.

4. Attach axon terminals to the other end of your axon.

5. Wrap myelin around your axon.

6. Create a nucleus for your soma by wrapping two pipe cleaners around each other. Attach your nucleus inside your soma. You have a neuron!

MAKE CONNECTIONS

MAKE ART
