

K-12 Students Want to Learn About Neuroscience!

Eisen, A., Howard, C., Benefiel, J., Schmidt, J., Chapek, M., Lerner, M., Garduno, R., Uriarte-Lopez, J., Hamilton, H., Kiersarsky, S., Sumrall, L.
Portland State University, Portland Oregon 97202 (*Correspondence: aaeisen@pdx.edu)

The Neuroscience Club at Portland State University traveled to Grants Pass, Oregon and met with over 300 students at North Middle School. These are some of their questions!

"If people are deaf what language do they think in?"

"How are some people artistic and others not?"

"Why do we see things that we think of?"

"What happens inside the brain of people with childhood trauma?"

"Does the brain function on it own? How do we change our brain?"

"Why do people have different levels of intelligence?"

"What part of the brain makes questions?"

"What does smoking do to the brain?"

"How come the brain never rests when we sleep?"

"What happens when two emotions go against each other"

"How does the brain learn so many words and not forget?"

"Do you always have dreams? If so why do we have them?"

"Why is there different parts of the brain with different jobs?"
